EXPERIENCE

Automation & AI Projects

July 2026- PRESENT

- Built and managed multiple automation systems using **n8n**, **Zapier**, **APIs**, and **AI tools**.
- Developed a fully automated eCommerce workflow for **TaherShop.com**, including Messenger automation, WhatsApp automation, customer support automation, API integrations, and AI-powered chatbot solutions.
- Designed AI workflows using **LangChain** and modern AI models to automate customer interactions, lead handling, and business operations.
- Created a complete hospital patient booking automation system where users can:
 - Book appointments online
 - Make online payments
 - Cancel appointments automatically
 - Receive automated refund processing after cancellation
- Experienced in integrating third-party APIs, payment gateways, communication platforms, and workflow automation tools to create scalable business solutions.

Web Development Projects

May 2024 - June 2026

- Developed multiple websites using WordPress, including:
 - eCommerce websites
 - Travel agency websites
 - Portfolio websites
 - Educational and institutional websites
 - Business websites
- Worked on website customisation, WooCommerce management, automation integration, and user experience optimisation.
